INTRODUCTION

The East Sussex Joint Strategic Needs and Assets Assessment (JSNAA) scorecards present data on over 200 indicators of health and wellbeing. The Local Authority (LA) view JSNAA scorecards present the data for the wards and districts/boroughs in the county of East Sussex.

This year there are 206 indicators presented in the following sections:
- Population
- Wider determinants of health and wellbeing
- Healthy lifestyles
- Disease and poor health
- GP patient survey
- Social care

In addition to the LA view, a set of scorecards is presented at NHS view (GP practices, localities/communities of practice and Clinical Commissioning Groups [CCGs]).

How to read the scorecards

In each scorecard:

1. The title provides a brief description of the indicator.

2. Information on the county of East Sussex is presented at the top of the page. Then individual districts and boroughs, and their wards, are ordered according to their Index of Multiple Deprivation (IMD) 2015 scores (descending) (see scorecard 2.01 for IMD 2015 scores).
   - Hastings is shown first (top left) because (according to IMD scores) it is the most deprived of the five districts and boroughs in East Sussex. Central St Leonards is shown first in Hastings because it is the most deprived ward in the borough.
   - Crowborough St Johns is bottom of the whole list (bottom right) because it is the least deprived ward in the least deprived district/borough (Wealden) in the county.

3. For each area the counts (left hand column headed ‘Count’) and value (right hand column headed ‘Value’) are given. In the example, on the next page, there are 506 looked after children in East Sussex, and the rate of looked after children is 5 per 1,000 population aged under 18 years.

4. Upward or downward pointing triangles indicate values that are (statistically) significantly higher or lower than the overall value for East Sussex at a 95% confidence level. (Note that it is not possible to perform this test for all indicators.)
   - In this example the rate of looked after children in Wishing Tree ward (11 per 1,000 population aged under 18 years) is significantly higher, at the 95% confidence level, than the overall rate for East Sussex.
5. Values (thick black lines) are plotted on the spine charts to the right of the data. Each chart summarises the range of scores for all the wards in the county.

- The schematic at the bottom left of the scorecard provides an annotated version of the spine chart, showing the minimum, median and maximum values, and the values for the 10th, 25th, 75th and 90th percentiles.
- The scorecard spine chart gives a visual presentation of how the ward (and district/borough) values compare to one another and to East Sussex. In this example Central St Leonards and Castle wards rank in the 10% of East Sussex wards with the highest rates of looked after children, and Central St Leonards has the highest rate of all East Sussex wards.

### Looked after children (LAC), rate per 1,000 population aged under 18 years, 31 March 2016

6. For some areas no counts/values are shown. There are various reasons for this. Counts/values for an area are suppressed if counts are less than 5 (as in Maze Hill ward in the example shown above), and for some areas data may simply not be available.

7. The ‘How to interpret’ box at the bottom of the scorecard provides an explanation of how to read the scorecard and further information about the indicator.
Confidence intervals and statistical significance

It is important to take into account the extent to which natural variation, inherent in the world around us, impacts on JSNAA indicator scores. (An example of the effect of natural variation is the variation in mortality rates that is seen from year to year within any area.)

For many of the JSNAA indicators it is possible to assess the precision of the indicator values by determining appropriate confidence intervals. If the confidence interval for a ward (or district or borough) does not overlap with the confidence interval for East Sussex its value is flagged as significantly different (▲ denotes significantly higher and ▼ denotes significantly lower) to the value for East Sussex. With a 95% confidence interval, as used here, the probability of the true value falling outside the limits of the interval is 1 in 20.

Modelled data

The counts and values for some indicators are derived from modelled data and this is always indicated at the end of the scorecard’s title, by (Modelled). Scorecards containing modelled data are listed below, together with a brief explanation of how the modelling was performed.

Scorecards 2.01-2.03, 2.05, 2.09, 2.15, 2.23-2.24, 2.32 & 4.03
Index of Multiple Deprivation 2015 (IMD 2015) scores, and scores for each domain of the Indices of Deprivation 2015, have been modelled from Lower Super Output Areas (LSOAs). This was done by allocating the population weighted average of the combined LSOA scores to wards, districts and boroughs, and to East Sussex.

Scorecards 3.08-3.09, 3.18-3.29, 4.10-4.11, 4.15, 4.23, 4.25-4.26, 4.28-4.29, 4.32, 4.34-4.35, 4.37, 4.49, 4.51-4.52, 4.54, 4.57, 4.59-4.60, 4.62-4.66, & 5.01-5.06
Counts and values were modelled from GP practice to ward level by identifying the wards in which patients live and allocating the population weighted average of the combined practice counts to each ward. Data for patients resident in East Sussex but attending practices outside East Sussex are included.

Scorecards 4.16, 4.24 & 4.33
GP reported prevalence data, and expected prevalences derived from national research, have been modelled from GP practice level to ward level by identifying the wards in which patients live and allocating the weighted average of the combined practice counts to each ward. Data for patients resident in East Sussex but attending practices outside East Sussex are included.
SECTION 2: WIDER DETERMINANTS OF HEALTH AND WELLBEING

INDEX OF MULTIPLE DEPRIVATION

Scorecard 2.01  Index of Multiple Deprivation 2015 (IMD 2015) score, from the Indices of Deprivation 2015 (ID 2015) (Modelled) ................................................................. 40

ECONOMY AND INCOME

Scorecard 2.02  Income Deprivation Domain score represented as a percentage, from the ID 2015 ........................................................................................................... 41

Scorecard 2.03  Income Deprivation Affecting Children Index (IDACI) represented as a percentage, from the ID 2015 ................................................................. 42

Scorecard 2.04  Percentage of children aged under 16 years living in low-income families, as at 31 August 2014 ................................................................. 43

Scorecard 2.05  Income Deprivation Affecting Older People Index (IDAOPI) represented as a percentage, from the ID 2015 ................................................................. 44

Scorecard 2.06  Estimated percentage of households in fuel poverty, 2014 45

Scorecard 2.07  Percentage of pupils receiving the pupil premium, resident-based, January 2016 ................................................................. 46

Scorecard 2.08  Percentage of households with dependent children and no adults in employment, 2011 ................................................................. 47

Scorecard 2.09  Employment Deprivation Domain score represented as a percentage, from the ID 2015 ................................................................. 48

Scorecard 2.10  Percentage of working age people claiming Job Seekers Allowance (JSA) and Universal Credit (UC), August 2016 49

Scorecard 2.11  Percentage of working age people claiming Employment and Support Allowance, February 2016 ................................................................. 50

TRANSPORT

Scorecard 2.12  Percentage of households with no cars or vans, 2011 51

Scorecard 2.13  Percentage of households who can access a GP practice within 15 minutes using public transport/walking, 2014 ................................................................. 52

Scorecard 2.14  Percentage of households who can access a Hospital within 30 minutes using public transport/walking, 2014 ................................................................. 53

2.4 EDUCATION

Scorecard 2.15  Education, Skills and Training Deprivation Domain score, from the ID 2015 (Modelled) ................................................................. 54
Scorecard 2.16  Percentage of pupils having reached a good level of development in the Early Years Foundation Stage (end of reception year for pupils aged 5), resident-based, June 2016 .......................................................... 55

Scorecard 2.17  Percentage of pupils achieving the expected standard at Key Stage 2 (end of year 6 for pupils aged 11) in Reading, Writing and Maths, resident based, June 2016 .......................................................... 56

Scorecard 2.18  The average GCSE attainment 8 score of pupils at Key Stage 4 (end of year 11 for pupils aged 16), resident-based, June 2016 .......................................................... 57

Scorecard 2.19  Percentage of the working age population with no or low qualifications, 2011 .......................................................... 58

Scorecard 2.20  Pupils with special educational needs (SEN) on SEN Support, rate per 1,000 pupils, resident-based, January 2016 .......................................................... 59

Scorecard 2.21  Pupils with a statement of special educational needs (SEN) or an Education, Health and Care Plan (EHCP), rate per 1,000 pupils, resident-based, January 2016 .......................................................... 60

Scorecard 2.22  Young people aged 16 to 18 years who are not in education, employment or training (NEET), monthly average rate per 1,000, November 2015 to January 2016 ...

HOUSING

Scorecard 2.23  Barriers to Housing and Services Domain score, from the ID 2015 (Modelled) .......................................................... 62

Scorecard 2.24  Living Environment Deprivation Domain score, from the ID 2015 (Modelled) .......................................................... 63

Scorecard 2.25  Percentage of households that are overcrowded, 2011 .......................................................... 64

Scorecard 2.26  Percentage of households with no central heating, 2011 .......................................................... 65

Scorecard 2.27  Percentage of households which are owned outright or owned with a mortgage or loan, 2011 .......................................................... 66

Scorecard 2.28  Percentage of socially rented households, 2011 .......................................................... 67

Scorecard 2.29  Percentage of privately rented households, 2011 .......................................................... 68

Scorecard 2.30  Percentage of persons living in care homes with nursing, 2011 .......................................................... 69

Scorecard 2.31  Percentage of persons living in care homes without nursing, 2011 .......................................................... 70

CRIME AND DISORDER

Scorecard 2.32  Crime Domain score, from the ID 2015 (Modelled) .......................................................... 71

Scorecard 2.33  Total number of recorded crimes per 1,000 population, 2015/16 .......................................................... 72
Scorecard 2.34  Number of recorded incidents of Anti-Social Behaviour per 1,000 population, 2015/16 .................................................................73

Scorecard 2.35  A&E attendances between 8pm and 4am by people aged 15-59 years due to assaults, rate per 1,000 population, 2013/14 to 2015/16 .................74

Scorecard 2.36  Emergency hospital admissions due to violence, age and sex standardised ratio, 2013/14 to 2015/16 (East Sussex = 100) .................................75
## Scorecard 2.01  Index of Multiple Deprivation 2015 (IMD 2015) score, from the Indices of Deprivation 2015 (ID 2015) (Modelled)

**How to interpret**

The higher the score the more deprived the area. Therefore Hastings (33.11) is more deprived overall than Lewes (15.07). The score for East Sussex is 18.83. Note that an area with an IMD score twice that of another is not necessarily twice as deprived as the other.

#### How to interpret

Percentage of households. Please note that it appears that Uckfield Community Hospital has been excluded from the list of hospitals used nationally for this indicator. In East Sussex 73% of households can access a hospital within 30 minutes using public transport/walking. In Hastings it is 84% and in Lewes it is 63%. Note that a new travel time method has been adopted in 2014. See guidance notes at: https://www.gov.uk/government/statistics/journey-time-statistics-access-2014.

**How to interpret**

Rate per 1,000 pupils resident in East Sussex and attending East Sussex maintained schools. In Hastings 41 per 1,000 pupils have a statement of SEN or an EHCP. In Lewes 35 per 1,000 pupils have a statement of SEN or an EHCP. Note that schools are currently in a transition phase, during which pupils with a statement of SEN are reviewed and, where appropriate, are moved to the new EHCP.
### Scorecard 2.22  Young people aged 16 to 18 years who are not in education, employment or training (NEET), monthly average rate per 1,000, November 2015 to January 2016

</tbody>
</table>

How to interpret
The higher the score the greater the barriers to housing and services in the area. Therefore Hastings (21.0) has lower barriers to housing and services than Lewes (23.5). The score for East Sussex is 22.6. Note that an area with a barriers to housing and services deprivation score twice that of another is not necessarily twice as deprived as the other.
How to interpret
The higher the score the more deprived the living environment of the area. Therefore Hastings (28.5) is more deprived in terms of living environment than Lewes (13.7). The score for East Sussex is 18.7. Note that an area with a living environment deprivation score twice that of another is not necessarily twice as deprived as the other.

### How to interpret

The higher the score the more crime in the area. The score for East Sussex is -0.39. Hastings (0.35) has higher crime levels than Lewes (-0.48). Note that areas can have negative values, and that an area with a Crime Domain score twice that of another is not necessarily twice as deprived as the other.
## Scorecard 2.33  Total number of recorded crimes per 1,000 population, 2015/16

### How to interpret
A&E attendances for assaults per 1,000 population aged 15-59 years (attendance between 8pm and 4am). In East Sussex there are 1.6 attendances per 1,000 population. In Hastings there are 2.2 attendances per 1,000 population and in Lewes there are 1.3 per 1,000 population. Note that this indicator excludes follow up A&E attendances for the same incident. Note that data relates to where patients live, not where assaults took place.

**How to interpret**

The value for East Sussex is 100. Values above 100 indicate more emergency hospital admissions due to violence (ICD10 X85-Y09 in any diagnosis position) than expected compared to East Sussex, and values below 100 indicate fewer admissions than expected. Hastings (181) has 81% more admissions than expected and Lewes (103) has 3% fewer admissions than expected.
